

RASIKA DEODHAR

☎ +1-(612)-356-8720 ✉ rasikadeodhar95.12@gmail.com 💼 linkedin.com/in/rasika-deodhar 🐙 github.com/Rasika-Deodhar

Background in full-stack development with React/Next.js, Node.js, FastAPI, and REST/GraphQL APIs. Hands-on experience in building and deploying Generative AI and LLM-based applications, including LLM-powered chatbots, document extraction, and question-answering systems using prompt engineering, Retrieval-Augmented Generation (RAG), LangChain, and models such as OpenAI GPT-4o and Llama 3. Proficient in integrating vector databases (Chroma, Qdrant) for semantic search, working with Git-based CI/CD pipelines, Docker containerization, and cloud environments (AWS/GCP). Comfortable collaborating in Agile and Kanban teams and quickly adapting to new tools and frameworks in fast-paced projects.

SKILLS

- **Languages & Frameworks:** Python | Java 8 | JavaScript | TypeScript | Angular 9+ (RxJS, NgRx) | React | Node.js | LangChain | Express.js | RESTful APIs | HTML | CSS
- **AI / LLM & Data:** Gen AI | Prompt Engineering | RAG | LLM-Based Applications | OpenAI GPT | Llama | Hugging Face Transformers | Vector Databases (Pinecone | Chroma | Weaviate) | Embeddings | Semantic Search | Document Extraction | Question-Answering Systems | LLM-Powered Chatbots
- **Cloud & DevOps:** Docker | Kubernetes (basics) | Jenkins | GitHub Actions | Git | Bitbucket | CI/CD Pipelines | AWS (EC2 | S3 | Lambda - Free Tier) | GCP (POCs)
- **Tools & Platforms:** Postman | Swagger/OpenAPI | JIRA | Azure DevOps (ADO) | VS Code | IntelliJ | Eclipse | Anaconda | Jupyter
- **Databases:** MongoDB | SQL | PostgreSQL
- **Workflows:** Make | n8n
- **Enterprise Architecture:** Business alignment | Strategic Planning | Architecture designs | Technology Evaluation | Governance & Standards | Stakeholder collaboration | Change Management

CERTIFICATIONS

- **Certified AI-Empowered SAFe Agilist** | Scaled Agile, Inc. | *Valid until April 2027*

EXPERIENCE

- Qlik**
AI Program Management Intern

June 2026 – Present
St. Paul, Minnesota

 - Building **AI agent workflows** and **automation pipelines** using **n8n** and **Salesforce** to shift post-sales customer support toward a self-service model, reducing dependency on live agents for help desk resolution.
- MMC Innovation Lab**
Applications Developer

October 2022 – July 2024
Dublin, Ireland

 - Contributed to the development and deployment of **Generative AI solutions**, including company-wide **LLM-powered chatbot (LenAI)** and document extraction workflows using **prompt engineering** and **Retrieval-Augmented Generation (RAG)**, reducing manual data entry time by 40%.
 - Built and tested **Proof-of-Concept (PoC) applications** with **OpenAI GPT models, Llama, LangChain**, and vector databases (**Pinecone/Chroma**), accelerating the internal R&D cycle by 3 weeks.
 - Designed, developed, and published **internal APIs and client libraries** for **Text-to-Speech** and **Speech-to-Text** services using **Google Apigee** supporting 10k+ monthly API calls across multiple internal teams.
 - Supported internal adoption of LLM technology by conducting **hands-on workshops**, creating reusable prompts/templates, and assisting teams with integration, onboarding 100+ employees to the GenAI framework.
 - Collaborated with cross-functional team using **Kanban practices** to deliver rapid prototypes and production-ready AI features, maintaining a 5-10% on-time delivery rate for sprint goals.
- Citi**
Technology Analyst

September 2020 – October 2022
Dublin, Ireland

 - Developed and maintained **full-stack features** for a global scaled application using **Java 8, Spring Boot, Angular 9/10**, and **Oracle DB**, improving overall system throughput by 20%.
 - Performed **UI migration** from legacy systems to **Angular** for improving performance and maintainability, resulting in a 40% decrease in page load times and enhanced user engagement.

- Supported BAU activities for **high-volume trading platform applications**, including bug fixes, production releases, and on-call rotation, maintaining 99.9% platform uptime and reducing critical incident resolution time.
- Actively engaged in **Agile ceremonies** (sprint planning, daily stand-ups, retrospectives) within a globally distributed team, contributing to a 20% increase in team velocity over 12 months.

Informatica

June 2020 – September 2020

Software Developer Intern

Dublin, Ireland

- Developed backend **REST APIs** in **Java 8/Spring Boot** and frontend components in **React** for a cloud-native data governance platform. Gained hands-on experience with enterprise code reviews and **CI/CD practices**.

EDUCATION

St. Cloud State University

Expected December 2026

Master's in Engineering Management

GPA: 4.0

- **Work Authorization:** CPT, OPT and STEM OPT

The University of Pune

July 2017

Bachelor of Engineering in Information Technology

GPA: 3.60

ACADEMIC PROJECTS

Technical Product Management & Operations | *MS Project, SAP ERP, ANOVA, AI Prompt Engineering*

- **End-to-End Project Planning:** Developed a Project Charter and Work Breakdown Structure (WBS) for a 6-month operational simulation; used **MS Project** to manage task dependencies, resource allocation (labor/material), and cost-assigned baselines across all project phases.
- **Risk & AI Integration:** Built a **10-point risk matrix** (Probability/Impact scoring) and applied **AI prompt engineering** to optimize charter generation workflows and team recognition strategies, reducing planning cycle time.
- **ERP & Supply Chain Analysis:** Executed real-time business processes and inventory management via **SAP ERP (ERPSim)**; authored a **20-page operational deep-dive** on Hormel Foods' global supply chain, analyzing demand forecasting, procurement, and distribution efficiency.
- **Quality Engineering:** Conducted a **Gage R&R Study** using **ANOVA-based Measurement System Analysis (MSA)** to quantify repeatability and reproducibility of manufacturing measurement processes; delivered process optimization recommendations for two production facilities.

Data Analytics & Machine Learning | *Python, Pandas, Scikit-learn, NLP, Jupyter, REST API*

- **Data Preparation & Analysis 🔄:** Consumed a **RapidAPI Food Calorie REST API** to extract and wrangle a multi-category nutritional dataset; performed **end-to-end data preprocessing** (cleaning, normalization, type casting) and built **exploratory visualizations** (Pandas, Matplotlib) to surface nutrient composition patterns across fruit categories.
- **Performance Evaluation of Text Classification Algorithms 🔄:** Scraped and preprocessed multi-domain review datasets (fashion, gym, hair salon) via **web scraping**; applied full **NLP pipeline** (tokenization, stopword removal, stemming, lemmatization) and trained **Naïve Bayes classifiers** per domain; conducted **comparative performance evaluation** across models using accuracy, precision, and recall metrics to identify the best-fit classifier per dataset.
